

DB29 LiF Soil Biology Accelerator

What is DB29?

DB29 is a unique micronutrient blend formulated by microbiologists specifically for feeding and stimulating soil bacteria to create an increase in population with a longer more stable life. DB29 has been used by our microbiologists for many years in feeding bacteria in the fermentation process.

Economic Benefits of DB29

DB29 on Corn +5.5 bpa

2 years of replicated testing on ind research farms
95% win rate
2.4% yield increase

DB29 on Soy +2.25 bpa

2 years of replicated testing on ind research farms
96% win rate
3.5% yield increase

Operational Benefits of DB29

DB29

- Can be applied Foliar or in furrow
- 1 pint (16oz) per acre use rate
- Compatible with herbicides, adjuvants, fungicides, liquid starter fertilizers and insecticides in tank mixes.
- Convenient package sizes
 - 2x2.5 gallon case treats 40 acres

Increased nutrient utilization

Reduce negative effects of heat and drought stress

Increases biological product performance

Agronomic Benefits of DB29

DB29 is a special blend of micronutrients formulated to feed soil biology. DB29 causes a much longer more stable enhancement of soil biology than other sugar based competitors in the bio stimulant market. Sugar based biostimulants cause a rapid increase and then a rapid decrease in soil biology. DB29 creates a longer and more stable benefit to your crop and is a great additive product to other Dakota Bio biological products.

DB29 is compatible in tank mixes with herbicides, fungicides and starter fertilizers.

DB29 works on all crops and plants.

DB29 +5.5 bpa on corn, 2yrs of testing

Dakota Bio

Dakota Bio is a privately owned company with employees that have a long history in biologicals and US farming. We understand the challenges and demands on farmers and crop production.

What we do

Dakota Bio uses advancements in biotechnology and beneficial microorganisms to create products that increase yields, crop nutritional value and farm income.

Born on Date

Dakota Bio is the first and only supplier in the industry to use a born on date on our biological products. The born on date guarantees that your product is made fresh. Fresh and healthy biologicals perform better in your field.

Ultra High Purity

Dakota Bio uses pharmaceutical and food grade fermentation for all of our biological products. This brings you the best products possible.
